Operation Steps:

Step1: install IQ SmartPen Driver under the Windows;

Step2: insert the USB receiver into the USB interface of PC;

Operation Tips:

1. The reception distance of the receiver will be reduced by the interference of the surrounding electronic devices.
2. The machine automatically enters the power-saving mode when there is no operation. Do not need to shut down the machine during normal use.
3. When the battery of this product is too low, the blue indicator light will flash, please charge it in time.
4. When charging, the red light is on, and when charging is completed, the red light is off.

NOTE 1: Please kindly download IQ SmartPen Driver in the following website:
<https://iqboard.net/smartpen>

Note 2: IQ SmartPen and USB receiver have been paired successfully before leaving the factory. If IQ SmartPen and receiver are not paired and the product cannot be used normally, please press and hold the KEY1 and KEY4 buttons on the smart pen at the same time and then insert the USB receiver. The mouse cursor starts to draw circle, then you can release the button. Paired successfully!
